EYE PROTECTION POLICY

NKA ENERGY VENTURES SDN BHD recognises that in the conduct of its activities, protecting the Health and Safety of all persons and Safeguarding the Natural Environment always take precedence.

For the purpose of preventing eye injuries, it is a mandatory requirement that appropriate Eye Protection Equipment be worn:

- In areas at worksite which has been designated as Eye Protection Area. These areas are normally marked with “WEAR EYE PROTECTION” signs.
- When carrying out activities where there is a Risk of Eye Injuries from flying particles.

This requirement applies to all Company employees who are working in Company controlled premises and in other premises under Company’s Prevailing Influence. Safety Spectacles are the minimum protective eye equipment to be used.

If wearing of Safety Spectacles results in discomfort to an individual such as giddiness, fogging of lenses, etc during work, the person shall immediately inform the Senior Supervisor on site. The Supervisor shall assess the situation and decide on an alternative eye protection arrangement. In the case of persistent giddiness, the individual should be referred to a medic or doctor.

In addition to the Safety Spectacles, different types of eye protection shall be provided according to the work performed and type of risk exposure.

Azman/Muhamed Dul
